ABOUT ME

I'm Kartikey Tripathi, a Computer Science BTech student specializing in Big Data Analytics. I am a logical and results-driven Web Developer dedicated to building and optimizing user-focused websites for customers with various business objectives. Judicious and creative when crafting effective websites, apps and platforms to propel competitive advantage and revenue growth. Technically proficient and analytical problem solver with calm and focused demeanor.

WORK HISTORY

○ Full-Stack Developer

06/2023-08/2023

DBSW | New Delhi

- Assisted in developing web applications using React and Node.js
- Collaborated with a team of 5 developers to enhance system performance
- Conducted code reviews and participated in daily stand-up meetings.
- Worked closely with UX/UI designers to translate their designs into functional web applications.
- Assisted in develoment of database and product optimization.
- Troubleshot technical issues related to front end development, ensuring prompt resolution to maintain project timelines.
- Conducted cross-browser testing to ensure consistent display across different devices and browsers.

○ Event-Managment Head

NSS CELL NSUT | NSUT

- Excellent communication skills, both verbal and written.
- Worked well in a team setting, providing support and guidance.
- Demonstrated respect, friendliness and willingness to help wherever needed.
- Assisted with day-to-day operations, working efficiently and productively with all team members.
- Skilled at working independently and collaboratively in a team environment.

PROJECTS

- **E-commerce Website:** Created a responsive e-commerce website using React and Node.js. Designed and managed a MySQL database for product and user information. Implemented secure user authentication and payment processing.
- **Weather App:** I developed a weather app using React for the frontend and Node.js with Express for the backend, integrating the OpenWeatherMap API for real-time data. The app features geolocation for local weather, seamless error handling, and a responsive design with Material-UI. Deployed on a cloud platform, it offers reliable and up-to-date weather information.
- **2D Game Portfolio Website:** I created a 2D portfolio game website using Tailwind CSS for styling and Kaboom.js for game development. The project also incorporates JavaScript for interactive elements and HTML5 for structuring content. Deployed on vercel, it showcases my skills through an engaging and responsive design.
